Add value to your home with our stylish,high performance

windows, doors and conservatories

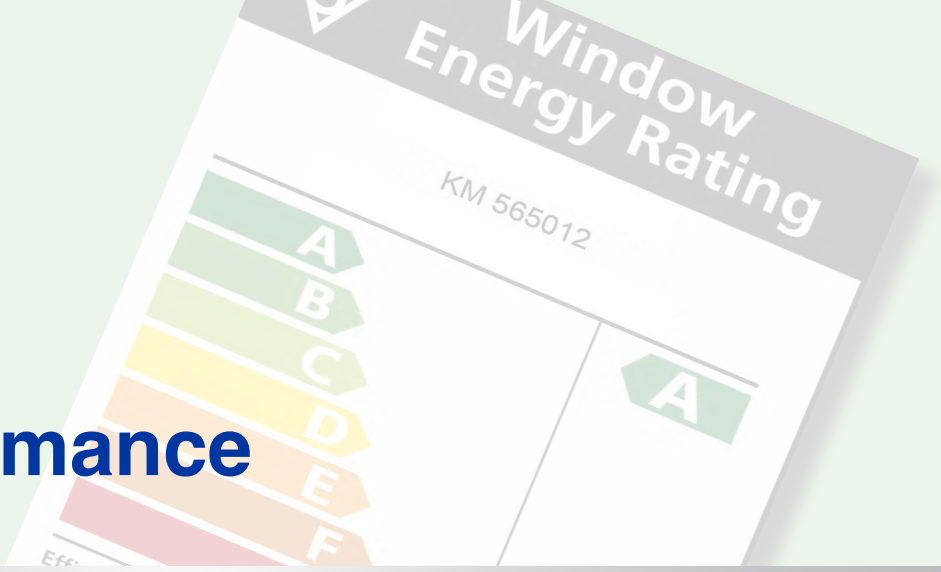

Energy efficient products installed with care

Energy Performance

All our products have been designed with energy efficiency in mind, stopping heat from inside your home escaping, while allowing heat from the sun into the room: the result - savings on fuel bills and reduced energy waste.

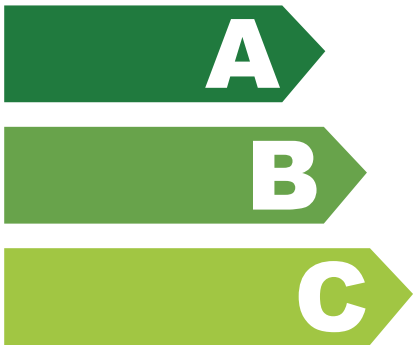

We install BSI Kitemark Energy Ratings (WER) windows, with A, B & C ratings available.

For every installation that qualifies for an energy rating, the correct energy performance certificate to give you peace of mind.

Choosing the right replacement windows can help make your home more energy efficient and reduce heating costs.

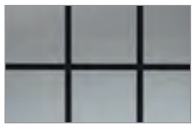

All our window systems can achieve an 'A' rating (A rated windows) - the highest energy rating and when installed with the appropriate glazing unit, double glazed windows from us comply with the latest building regulations.

Obscure glass

Bevels

We can offer a wide range of glass options to achieve energy ratings A, B or C with all our window systems. We combine low energy glass with warm edge spacer bar, and argon gas as standard. Low Iron glass is also available to enhance the energy performance further.

Casement windows

The most popular replacement window option, casement windows can be used for various installations as the simple design makes them suited to almost every property type whether it's an older home or new-build.

Our uPVC windows are practical, low maintenance and because they are uPVC you can be sure they will keep looking good for years to come!

Available in a variety of arrangements and sculptured designs, our astragal bars are suited for a use in a variety of different window types and styles.

With our choice of window frames you not only get a slim, stylish and attractive window frame, but also a product that incorporates all the benefits of modern uPVC.

Your uPVC frames will never need painting and will not warp, rot or discolour over time.

Alternative window options

Tilt and turn windows are an ideal for multi-storey buildings and window installations in difficult to reach places such as above a conservatory.

The bay window is common in older homes and we can supply uPVC windows in a range of styles and sizes to meet your requirements.

French windows are a classic twist on the casement style and are ideal for customers living in older properties as the traditional appearance fits in with homes of this style.

Both sashes on our uPVC French windows open fully to almost 90% to give a clear opening, proving natural ventilation to a room, and one sash carries the central mullion for an unobstructed view to outside.

Vertical sliding windows

With a range of wood grain foils to choose from, our sliding sash windows can be perfect for heritage homes or homes in conservation areas.

These are an excellent, easy to maintain and cost effective alternative to timber windows.

evolveVS

Our Evolve sliding sash windows perfectly emulate the traditional style and operation of period sliding sash windows with one major difference: they're made of truly convincing uPVC in timber effect. Simulating the diagonal profile joins seen in traditional wood-worked windows.

Our vertical sliding sash windows combine beautiful, traditional aesthetics with modern thermal performance.

Door and Window Security

Doors

Lockmaster 8 point lock strips are fitted to our Residential and French doors.

Cylinder guards come as standard around all our door cylinders. Cylinder guards make the cylinder virtually anti-snap.

Windows

Our hardware is the same for Rehau, Halo and Eurocell windows. BS 7950 multi point central locking shoot-bolt locks are fitted as standard on all our windows to ensure only the highest level of security. Our window handles are high security auto locking PVD finished.

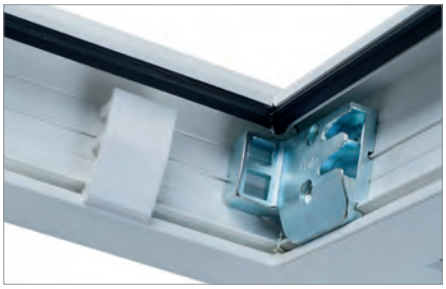

Easy-clean and egress hinges are fitted as standard on all side openings

High quality, durable corner keeps offer peace of mind.

uPVC Residential doors and panels

uPVC residential doors are incredibly low-maintenance, ideal for customers who want a stylish new front door that's also easy to keep looking good year after year.

With the extensive range of door designs and colours available it's easy to choose a door which complements the style, character, and personality of your home.

All our door panels come with high security MDF reinforcing and toughened safety glass as standard with 4 types of door threshold available.

REHAU

HALO

A BRAND OF THE VEKA UK GROUP

eurocell

Our Rehau, Halo and Eurocell doors are available with 4 types of door threshold.

French Doors

French doors have a classic design that suits most types of property.

We install uPVC inward or outward opening French doors.

REHAU®

HALO
A BRAND OF THE VEKA UK GROUP

eurocell®

French doors are fitted with hook and roller locks. Both doors have handles and full locking security as standard. All open outward doors are fitted with restrictors.

Patio Doors

Halo only

If space is a concern for you our attractive, slim-line uPVC sliding patio doors open up a room without the door intruding into the property, letting light in and giving great views to outside.

Our Halo sliding patio doors are available in a chamfered or a sculptured finish in white, oak and rosewood with a range of furniture options. 4 pane sliding doors are also available for wider openings.

GRP Composite doors

GRP Composite Doors are the latest in technology and design for doors. GRP (glass reinforced plastic) has been adopted by ship builders, and is still being used today because of its exceptional wind and water resistance. This means it provides strength, security and weather resistance. All GPR doors are available in the range of colours, with the inner skin being white.

VIRTUOSO
DOORS

Our GRP doors are foam filled for increased thermal efficiency and feature a GRP skin that is resistant to scratching, warping and fading to give you a low-maintenance and attractive new front door that's built to last.

Solidor Composite doors

The Solidor Collection is an outstanding range of industry leading, **solid** laminate timber core composite doors that combine classic, modern or futuristic styling with a full range of Secured by Design locking, providing a stunning, high quality and secure entrance to any home.

Each unique solid timber core is completely encapsulated within a highly durable plastic edge banding and two thermo plastic door skins.

These doors are available in ta wide range of styles and frame colours.

A comprehensive range of matching frames are available with either glass, matching composite side panel or quarter panel, that will complement the look of any property.

Stratus Lantern Roofs

Thermal break technology ensures that Stratus lantern roofs are warm in the winter and cool in the summer.

Combining sleek, contemporary looks with truly outstanding performance.

Available in 3 design models, Stratus comes in a choice of 2 hard-wearing exterior powder coated finishes, with a white interior.

Bi-fold Doors

Bi-fold doors open up a room in an elegant and efficient way.

All doors are folded in a space saving manner and conveniently slide to the side, making use of the aperture width and opening the room to the outside.

uPVC doors shown left.

Suitable for both residential and commercial applications, our aluminium bi-folding doors are available up to 6500mm wide and are available in endless colour options, even unique textured ‘sensation’ colours.

Warmcore

WarmCore bi-folding, French and residential door system has been adopted by house-builders and homeowners with enthusiasm. WarmCore doors are built around the same full width thermal core concept as WarmCore aluminium windows.

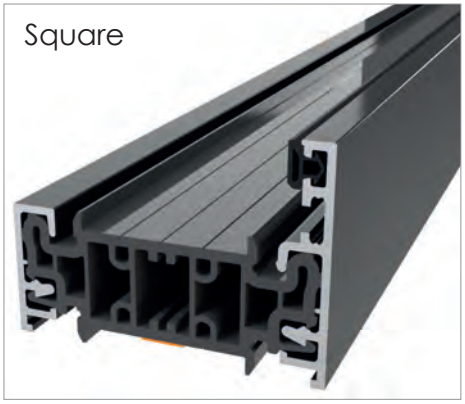

Key benefits of the system are:

- Superior thermal performance
- Choice of square or rounded frames
- 2 Casement options
- 4 Colour combinations and special colours on request
- 3 Bead finishes
- Triple glazing option available

At the heart of WarmCore products is a thermal core which significantly out-performs the thermal inserts commonly used to reduce the cold on aluminium. The result is "warm aluminium". A 70mm frame with a thermal insulating multi-chambered core.

WARM ALUMINIUM

Square

Rounded

Real Aluminium

With strong, slim profiles, long lasting quality materials and finish, the REAL Aluminium range covers a full suite of aluminium products. That includes: casement windows, bi-fold doors, sliding doors, residential doors, composite doors, and ultra slim glazed roof solutions.

Key benefits of the system are:

- Elegant, slim sightline - up to 50% slimmer than uPVC
- Aluminium is a rigid structure unlike PVC making it extremely difficult to remove the bead once fitted
- Colour options: White, Black, Grey, Grey Exterior/ White Interior
- High strength
- Thermally efficient

Conservatories

Our conservatories guarantee high quality and performance of the highest standards, while allowing each single building to 'speak the local language', adapting the style of the conservatory to its surroundings.

We can install high quality Global and K2 polycarbonate or glass conservatory roofs. These roofs use a range of energy efficient solutions to achieve maximum performance.

Celsius Solid Roofs

The superior thermal performance of Celsius Solid Roof creates a high quality living space that ensures warmth and comfort, helping to insulate the home, and saving on heating bills.

Key benefits of the system are:

- Celsius Solid Roof achieves a U-value of 0.18 W/m2K for compliance in England and Wales and a U-value of 0.15 W/m2K for compliance in Scotland is achieved by fitting insulated plasterboard
- Celsius Solid Roof is constructed using highly insulated Structural Insulated Panels, avoiding the use of an aluminium framework to create a truly warm solid roof construction
- 100% recycled polypropylene Envirotiles are available in a choice of appealing colours - Black, Dark Brown or Terracotta
- 10 year guarantee on tiles
- Large roof vents are available to allow in maximum light
